Thank you to all the contributors, the associate editors and reviewers for their great job and dedication!

DOTE: Editor's Recommendation - Vol 29 / Issue 4

Massive Para-esophageal hernias

Andre Duranceau

Giant para-esophageal hernias constitute a relevant challenge for gastroenterologist and surgeons with many unanswered questions. Should the presence of a giant para-esophageal hernia prompt to surgical repair even in asymptomatic or mild symptomatic patients? Given the high recurrence rate reported after primary repair, should we...
