## DOTe: Editor's Recommendation - Vol 29 / Issue 2

**Performance of different imaging modalities in assessment of Response to neo-adjuvant therapy in primary esophageal cancer.** *C. Yip et al.*

Although neo-adjuvant therapies (NT) are widely employed in the treatment of esophageal cancer, a substantial benefit in survival is evident only for those patients with an objective clinical and/or pathological response. ... [\(read the full article\)](#)
